Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a data transmission control method, classified in class 725, subclass 116.
- Claims 25-27, drawn to a receiving apparatus, classified in class 725, subclass 131.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transmission control in a bi-directional data transmission system. See MPEP § 806.05(d).
